

VENKATA ASHA DEEPIKA PENAGGANTI

(857) 313 4126 | ashapenagganti.neu@gmail.com | www.linkedin.com/in/ashadeepika09

SUMMARY

Experienced Analyst with 4+ years of expertise in data management, business requirements gathering, and process modeling. Proficient in the SDLC, Agile methodologies, and data-driven decision-making. Skilled in SQL, Microsoft Excel, Python, R, and BI tools like Tableau and Power BI. Adept at performing statistical analysis, handling large data requests for research projects, and developing machine learning models for efficient data processing and analysis.

SKILLS

Languages:	SQL, Python, R Programming
Business Intelligence Tools:	Microsoft Excel (VBA, Macros, Pivot Table), Tableau, Power BI, Alteryx, Visio, Lucid Chart
Packages:	NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, ggplot2
Databases:	MySQL, Microsoft Access, Oracle SQL Developer, Microsoft SQL Server, MS Access
Other Skills:	Informatica, Analytical and Research Skills, Requirements Gathering

EDUCATION

Master of Science in Business Analytics Northeastern University, Boston, MA	Dec 2023
Bachelor of Technology in Electronics and Communication Engineering VIT University, Vellore, India	Jun 2020

WORK EXPERIENCE

Ramsey County	St Paul, United States
Appraisal Services Analyst	May 2024 - Present

- Analyze and generate sales ratios and perform equalization studies to ensure accurate and equitable property valuations.
- Produce detailed property data reports, statistical summaries and visual representations of statistical findings, communicating key insights to supervisors and staff.
- Handle and respond to multiple data requests, utilizing SQL Developer, CAMA, and MS Excel to import, export, and analyze data to support business decisions and research work.
- Understand current trends in the CAMA-related industry, applying best practices and standards to work projects, processes, and property valuation models, while evaluating current valuation techniques.
- Create and maintain procedural guides and analytical workbooks for staff, supporting ongoing support for the CAMA system and yearly assessment modeling.
- Verify and audit data for the Minnesota Department of Revenue's sales ratio study, identifying discrepancies and recommending data improvements.
- Analyze and implement income-based mass valuation models into production, utilizing SQL and statistical analysis to understand model functionality and data structure.

Changing the Present	New York, United States
Business Analytics Intern	Feb 2024 - May 2024

- Designed and implemented the database structure for the "International Mentors Site" project including creating ER diagrams, defining tables, and establishing primary and foreign key relationships to ensure data integrity and efficient management.
- Worked with individuals across different project components to align backend database design with frontend development, ensuring smooth integration and optimizing user experience.
- Worked on solutions to export and maintain real-time Shopify store order data in Google Sheets, streamlining data integration and improving reporting efficiency.

DXC Technology	Bangalore, India
Professional 1 Software Engineer	Aug 2020 - Aug 2022

- Implemented over 50 change requests and user stories in the production database using Oracle SQL Developer and Informatica ETL, thereby finding root cause analysis and providing solutions that meet business requirements and improved database functionality.
- Developed and led the creation of RFC's (Request for Change), User Acceptance Test (UAT) planning and testing, achieving a 90% reduction in errors. This initiative ensured strict alignment with business needs and streamlined development processes.
- Resolved 50+ incidents raised via ServiceNow, adhering to service level agreements (SLA's) through back tracing Informatica workflows, database tables and stored procedures, leading to a 30% improvement in resolution times and efficiency.
- Monitored and scheduled over 4000 tidal workflow jobs across 100+ countries. This effort ensured efficient data transfer from HRIS systems (Workday) to downstream systems, facilitating timely payroll processing in AWS environment.
- Collaborated with SMEs, change management teams, and business analysts to facilitate technical communication and presented insights and updates to non-technical audiences effectively.

ACADEMIC PROJECTS

NOVICA (Capstone Project) (Tech: Python, MS Excel, Tableau, Machine Learning)

- Developed forecasting models (ARIMA, Prophet) to improve inventory strategy, achieving accurate 90-day forecasts for key SKUs.
- Performed OLS regression on low-view SKUs to pinpoint factors affecting session views, guiding enhanced keyword strategy.
- Segmented high-view SKUs by conversion rates and price/session and applied sentiment analysis for improved KPI's performance.
- Implemented the project using an agile approach, incorporating constructive feedback at each stage for further continuous progression.

Engagement of Esports (League of Legends) with Culinary (Tech: R, Tableau) | Performed data cleaning and feature engineering, followed by descriptive statistics to determine data trends. Built an interactive dashboard to track key performance indicators, significantly improving the food vendor's understanding of customer preferences and expected to result in a 30% increase in sales.

Prediction of Heart stroke (Tech: Python, Machine Learning) | Conducted exploratory data analysis using sea born and Matplotlib for a deeper understanding of data. Implemented statistical analysis using various machine learning models (Logistic Regression, Correlation Analysis, Random Forest) in Python to predict cancer likelihood based on lifestyle factors, achieving an accuracy rate of 85%.

Analyzing Fiscal Burden of Cancer Research (Tech: Python, Data Wrangling, Excel) | Transformed and enriched 24 datasets using advanced data wrangling techniques, including data modeling, formatting, and data profiling, along with descriptive analysis in Python. This led to insightful key findings about the financial dynamics of the US healthcare system.

COURSES & CERTIFICATIONS

- Assessment Laws & Procedures, Minnesota Association of Assessing Officers (MAAO).
- AZ-900: Microsoft Azure Fundamentals.
